**Eco-Green Cleaning**

### **Eco-Green Cleaning**

We are one of the only cleaners that does not use perchlorethylene-a known carcinogen-in our **cleaning methods**. Instead, we use an eco-green cleaning machine-odourless, non-toxic, cleaning that is safe for workers and the environment. It can be used with many sensitive fabrics and trims so if you are unsure if your clothing will be able to be dry cleaned, please ask one of our team members. In addition to our dedication to using environmentally-friendly cleaning products, we also recycle the hangers in our service and use biodegradable bags when returning clothing to customers.
